Modules

#1 B2B Sales/Order Taking App

SalesPresenter · CloudCart · ImportBuyer

Available Modules

Complex Pricing

Devices with this module will be able to utilise more complex pricing functionality such as customer-specific prices/discounts.

Specify the prices of your products in currencies outside of your base currency.

Utilise Quantity Break Structure for pricing/discounts to automatically adjust the price/discount dependant on the quantity that your customer is ordering.

Customer Account History

Allows you to upload historical customer order information to your Cloud account. Which will then be visible to SalesPresenter users.

You will also get access to various other data types such as, **Alternative Product Languages**, **Filter Trees**, **Backorders** and **Ledgers.**

Integrated Orders

Instantly upload orders to the cloud and get up-to-date information in your product catalogues.

Works Offline

You can still take orders at trade-shows or on the road and upload orders as soon as theres a Wi-Fi connection.

Contact Us!

Book your free consultation with us today for more information regarding SalesPresenter & CloudCart alongside the available modules.
